PROFESSIONAL SUMMARY

Proactive and results-driven Full Stack Engineer with strong expertise across the MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js, and TypeScript. Experienced in designing scalable RESTful APIs, modern server-side architectures, and intuitive digital learning interfaces. Hands-on with AI-assisted development workflows (Cursor, GitHub Copilot, Lovable), AWS cloud deployments, and multi-database management using MongoDB, PostgreSQL, and MySQL. Proven ability to convert product requirements into clean, testable code, troubleshoot production defects, and collaborate effectively within fast-paced Agile engineering teams.

TECHNICAL SKILLS

MERN & Full Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js, NestJS Basics, Full Stack Development

Languages & Frontend: TypeScript, JavaScript (ES6+), React.js, HTML5, CSS3, Responsive Design, State Management

Backend & APIs: Node.js, Express.js, RESTful API Engineering, Third-Party API Integrations, Server-Side Architecture

Databases & Management: MongoDB, PostgreSQL, MySQL, Relational & NoSQL Schema Design, Query Optimization, Data Layer Integrity

Cloud & DevOps: AWS Cloud Services (EC2, S3), Basic Cloud Deployment, Docker Basics, Git / GitHub Workflows, CI/CD

AI-Assisted Tools & Quality: Cursor, GitHub Copilot, Lovable, Unit Testing, Debugging, Clean Code Standards, Agile Ceremonies

TECHNICAL PROJECTS & EDTECH PLATFORMS

EdTech Skill Development & Learning Portal

MERN Stack, Next.js, TypeScript, MongoDB, AWS

- Architected a responsive learning platform using Next.js, React.js, and Node.js to enhance user skill development.
- Built scalable RESTful APIs in Express.js and managed data storage schemas using MongoDB and PostgreSQL.
- Leveraged AI-assisted development tools (Cursor, GitHub Copilot) to accelerate feature development and code refactoring.
- Deployed backend services and assets to AWS cloud environments, maintaining 99.9% uptime and low latency.

Digital Assessment & Career Discovery Engine

React.js, Node.js, MySQL, REST APIs, Git

- Designed interactive frontend components and student analytics dashboards adhering to clean code best practices.
- Integrated third-party APIs and optimized relational database queries, reducing record retrieval times by 30%.
- Handled end-to-end debugging and bug resolution across staging and local testing environments.

IntensHub - Service Operations Platform

TypeScript, Express.js, MongoDB, Git, Docker

- Collaborated with cross-functional peers to convert functional specifications into maintainable software modules.

PROFESSIONAL INTERNSHIPS & EXPERIENCE

Full Stack Engineer Intern | Tamizhan Skills

May 2024 - Jul 2024

- Developed and maintained full-stack web applications using MongoDB, Express.js, React.js, Node.js, and TypeScript.
- Constructed modular RESTful APIs and connected front-end interfaces with third-party web services and data

stores.

- Utilized Git for version control and peer code reviews, ensuring adherence to clean code and testing standards.

Auditor Intern | Compliance Unit

Jan 2023 - Mar 2023

- Audited operational process workflows and system compliance records with meticulous analytical precision.

EDUCATION

Bachelor of Computer Applications (BCA) - Technical Discipline

Graduation: 2026

- Srinivas University | Focus: Full Stack Systems, Data Structures, Relational & NoSQL Databases, Web Engineering

CERTIFICATIONS & TRAINING

- AWS Certified Developer - Associate (Cloud Services) - Infosys
- Introduction to Full Stack & Web Engineering Foundations - SkillUp
- GenAI Powered Data Analytics Job Simulation - Forage
- 30 Days Master Class in Modern Web Development & Production Software
- Artificial Intelligence Fundamentals Systems - IBM SkillsBuild

KEY ACTIVITIES & TECHNICAL ACHIEVEMENTS

- Built responsive MERN Stack applications utilizing Next.js, TypeScript, Node.js, and scalable RESTful API designs.
- Integrated multi-database architectures across MongoDB, PostgreSQL, and MySQL alongside AWS cloud deployment workflows.
- Proficient in AI-assisted development tools (Cursor, GitHub Copilot, Lovable) to deliver clean, maintainable software.
